SDG

Secure Cloud Services

GET A COMPREHENSIVE BASELINE ASSESSMENT

A thorough understanding of your organization's business priorities and where you are today is the key to creating a successful cloud strategy that supports future initiatives. At SDG, we begin with a comprehensive assessment of your overall business goals and current environment to gain a complete understanding. This assessment works to inform and guide your future strategy.

UNLOCK THE POWER OF SECURE CLOUD

How SDG's Expertise Can Assess, Migrate, and Secure Your Cloud Initiatives

In today's fast-paced digital landscape, the cloud has revolutionized the way businesses operate, offering unprecedented flexibility, scalability, and cost-effectiveness. SDG's Secure Cloud specializes in cutting-edge cloud computing services, with a keen focus on delivering seamless DevSecOps integrations, robust CI/CD pipelines, and comprehensive cloud security solutions. Through agile development practices, SDG enables clients to rapidly deploy and iterate applications while embedding security measures at every stage of the development lifecycle.

CLOUD DONE RIGHT

We have a strong team of experts, architects, designers, and developers to bring your strategy to reality. Transformation initiatives take many forms, including cloud migration strategies, cloud readiness assessments, automation with generative AI, application security and resiliency, and more.

CREATE A CLOUD MIGRATION STRATEGY

SDG professionals work with you to assess, plan, design, execute and operate your migration to the cloud. This strategy serves as the compass that guides your organization through the complex process of transitioning your operations and data to a secure cloud environment.

PUT ARTIFICIAL INTELLIGENCE TO WORK FOR YOU

The power of Generative AI is on the rise and knowing how to successfully govern these systems within a cloud or hybrid environment requires expert structure and governance knowledge. Learn more...

IMPLEMENT CONTROLS ACROSS HYBRID MULTI-CLOUD ENVIRONMENTS

Implementing controls in a complex cloud or hybrid environment introduces challenges that require a well-defined approach and Management buy-in to achieve. Our team are experts in balancing known and unknown organizational, personal, and cultural issues.

WE CAN SUPPORT YOUR ORGANIZATION 24/7

In addition to thoughtful and easy guidance by experts you can trust, we work to support brands globally with Levels 1, 2 and 3 technical support – available 24/7. We can assist your organization's need to maintain operational excellence and protect your brand, your assets, and your customers with a service and pricing model that works for your individual cloud and infrastructure strategy.

ADVISE

- Cloud Readiness Assessments
- Cloud Security Assessments
- Business Process Transformation
- DevSecOps Enablement
- Organizational Change Management
- Cloud Migration Strategies

TRANSFORM

- Infrastructure as code (IaC)
- Static Application Security Testing
- Dynamic Application Security Testing
- Mobile & Application Engineering
- Automated deployment processes (CI/CD)
- Automation with generative AI

MANAGE

- Infrastructure management
- Cloud environment management
- Cloud cost optimizations
- Threat response with proactive security monitoring
- Visibility into infrastructure and application performance

ABOUT SDG

SDG is a leading provider of technology, consulting, and managed services that enable organizations to confidently execute cybersecurity, identity, and risk management solutions to mitigate risk, protect assets, and grow securely.
